SUMMARY

Full Stack Developer / Software Engineer with 6+ years of experience building scalable fintech, e-commerce, and enterprise systems using Node.js, NestJS, TypeScript, React.js, Next.js, Angular, and Java/Spring Boot. Comfortable owning features end-to-end: applying OOP and microservices principles, designing SQL/NoSQL data layers (PostgreSQL, Oracle, MongoDB) via ORM tools (TypeORM, Prisma, Hibernate), integrating RESTful/SOAP payment gateways and third-party aggregators, and shipping CI/CD and cloud deployment pipelines (Docker, Jenkins, AWS) within Agile/Scrum/Kanban teams. Currently building AI agent-powered workflows into fintech products and completing a Master's in Software Engineering. Looking for a Senior Full Stack or Backend Developer role where I can take ownership of architecture decisions and keep growing toward technical leadership.

EXPERIENCE

Full Stack Developer - Erada Finance

Cairo, Egypt | Fintech | Aug 2024 - Present

- Own a Java/Spring Boot payment gateway service with REST API integrations to third-party payment aggregators for the company's lending platform.
- Contribute to xfin, an internal loan management system, supporting 3 core workflows: loan origination, guarantor, and repayment.
- Build a loan workflow and case management system so employees can accept/reject cases, change status, and reassign loan officer, branch, or team leader.
- Build an SSO admin panel (Node.js/NestJS, React.js) for CRUD management of users, authorities/permissions, and screens across internal systems.
- Design and build a WebSocket-powered AI agent (chat-based, LLM-integrated) that helps stakeholders analyze 3 key areas: loan performance, user profiles, and profitability.

Senior Backend Developer - SATA Technology Group

Cairo, Egypt | Nov 2023 - Aug 2024

- Built backend microservices (Node.js, NestJS, TypeScript, OOP) powering a food ordering and delivery platform across 4 connected apps: customer, vendor, driver, and dashboard.
- Implemented live GPS order tracking via WebSocket connections, giving customers and drivers real-time visibility into delivery status.
- Coordinated RESTful API contracts and RabbitMQ message queuing across 3 teams (vendor, driver, and dashboard), working in Agile/Scrum/Kanban sprints to keep the multi-app platform consistent end-to-end.

Backend Developer - Dafa

Giza, Egypt (On-site) | Aug 2022 - Aug 2023

- Built RESTful and SOAP-based backend services (Node.js, NestJS, SQL) for Frusiya, an equestrian ticketing and e-commerce platform, covering 3 product lines: competition tickets, club memberships, and horse/jockey merchandise.
- Applied secure transaction-handling practices and API documentation standards to checkout and ticketing flows while working at a payments-focused company.

Full Stack Developer (Part-time, Remote) - Digital Zone

Concurrent with full-time role at Dafa | Aug 2022 - Dec 2023

Continued supporting Digital Zone part-time and remotely after moving into a full-time role at Dafa.

- Maintained and extended 3 systems (restaurant management, inventory, and dashboard) built during the earlier full-time engagement.
- Built a web scraping tool with automated Excel export, cutting manual data-entry work in the client's reporting process.

Full Stack Developer (Full-time, Remote) - Digital Zone

Aug 2021 - Aug 2022

- Built 3 systems from scratch for a small business client using TypeORM/MySQL: a restaurant management dashboard, an inventory/stock management system, and a point-of-sale module.
- Delivered a multi-vendor e-commerce solution (React.js frontend, Node.js backend) covering catalog browsing and order placement.

PERSONAL & FREELANCE PROJECTS

Hotel Reservation & Management System - Staywo | Freelance

Apr 2022 - Aug 2022

- Built booking and reservation workflows for a hotel management platform using NestJS.

E-Commerce Marketplace - Personal project | Node.js, EJS, MongoDB

2020

- Built from scratch: a marketplace serving 4 user types (customers, wholesalers, shops, and factories) who can list, search, buy/sell goods, and chat directly with each other.

github.com/abdo20010dx/online-shop

Consultant Chat App & Points Calculator - University project | HTML/JS

2020

- Built a platform where users could calculate eligibility points and chat with consultants/experts to get guidance on their case.

DevOps Auto-Deploy Pipeline - Udacity Cloud DevOps Nanodegree | Capstone

2022

- Built an automated, Git-triggered CI/CD pipeline integrating 6 tools (CircleCI, AWS, Prometheus, Ansible, PM2, Docker) covering build, deployment, monitoring, and alerting.

EDUCATION

Master of Software Engineering - Cairo University

Thesis phase | Expected 2027 | Grade: Good

B.Sc. Management Information Systems - Alexandria University

2017 - 2021 | Grade: Good (75%)

CERTIFICATIONS

- [Advanced Cloud DevOps Nanodegree - Udacity \(2022\)](#)
- [Typing Certificate, 60 WPM / 99.3% accuracy - Ratatype \(2023\)](#)
- ALX Professional Foundations - Soft Skills (2023)
- Udemy: JavaScript, Node.js, NestJS, React.js, Angular, Java 17, Spring Boot & Hibernate, SQL & Databases, Business Analysis, Bash Scripting

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Backend: Node.js, NestJS, Spring Boot, REST & SOAP APIs, WebSocket, Message Queuing (RabbitMQ), Microservices, OOP

Frontend: React.js, Next.js, Angular, HTML, CSS

Databases & ORM: PostgreSQL, MySQL, Oracle, MongoDB, Prisma, TypeORM, Hibernate

DevOps & Cloud: Docker, Jenkins, AWS, CI/CD, Prometheus, Ansible, Linux, Bash

AI & Dev Tools: AI agents & prompt engineering, Cursor, Claude, Git, VS Code

Methodologies: Agile, Scrum, Kanban, Business Systems Analysis, API Documentation

LANGUAGES & SOFT SKILLS

Languages: Arabic (Native), English (Full Professional Proficiency)

Soft Skills: Communication, Collaboration, Problem-Solving, Organizational Skills, Time Management, Adaptability
